DETAILED ACTION

Response to Amendment

1. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was found to be persuasive.

EXAMINER'S AMENDMENT

2. In view of the Applicant's election of group I claims without traverse in their response on March 1, 2005, the nonelected group II claims 23 – 39 were cancelled.
3. The Applicant's representative was contacted for amending claim 18 to overcome antecedent problem.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Matthew J. Mason on July 29, 2005.

The application has been amended as follows:

In claim 18, line 8, following the word "seed", the word - - metal - - was inserted.

In claim 18, line 10, following the phrase "plating a", the word - - metal - - was inserted.

Claims 23 – 39 have been cancelled.

Allowable Subject Matter

4. Claims 1 – 22 are now allowed.

Art Unit: 2891

5. The following is an examiner's statement of reasons for allowance:

Claims 1 – 17 recite, inter alia, a method of making a metal gate for a FET in which the recessed region extending to the underlying gate dielectric and defining the position and the dimension of the gate is filled with a filler metal by an electroplating process. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 18 – 22 recite, inter alia, a method for making a metal gate for a n – FET and a p – FET comprising the steps of selecting a substrate having a top surface and at least two recessed regions extending to an underlying dielectric and the recessed regions defining the position and the dimensions desired for the two gates, blanket depositing a seed metal layer with an n – FET work function, masking off the n – FET gate, selectively plating a metal layer allowing for a p – FET work function on the p – FET gate, removing the mask from the n – FET gate and annealing the metal layers to form an alloy with a p – FET work function. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
